

AI-driven digital behavior analysis revealing coordinated manipulation threats.

Taios addresses platform, algorithm and protocol leverage manipulation that threatens trust in everyday digital platforms. Our systems use AI to detect coordinated nodes of influence that intent to blur reality.

## Ethos

At Taios, we uncover the unseen dynamics of online behavior. Our mission is to empower platforms and organizations with real-time insights into evolving risks, enabling them to maintain transparent and resilient digital environments. Taios is focused on early awareness and transparency to help platforms and organizations deliver authentic interactions to digital users.

## Who is Taios for?

- Governments and Policymakers
- Social media platforms
- Stock and crypto trading platforms
- Democracy monitoring groups
- Intelligence agencies
- Journalism and research institutions
